Vice President's Message

As I write this message, it is 78° outside and the middle of February. Happy Valentine's Day, indeed! By the time you read this, things should really be hopping at my house. I'm hoping to be swamped with early registrations for the '96 Nationals in Springfield, Missouri, and not have time to worry about how nice it is outside.

Jim Hatcher and I will be traveling to Springfield on the 24th of February to finalize the banquet menu, tie up some loose ends with the hotel and visitors' bureau, and try to get some sponsorship from the Ford dealer next door to the hotel. We'll let you know all the details as soon as everything is finalized.

We have two T-shirt sponsors to date and three others have committed. Thanks to Melvin and Michael Jones of Obsolete Ford for the early response. You can't really appreciate how much this helps the finances! The dash plaques have been received; they have two '66 Rancheros on them, one red and one black. The wall plaques are designed but not ordered and will contain two different '66s, one yellow and one red. The T-shirts will also feature two different '66s. A little hint — all of the '66s that are featured were at the last Nationals.

Most of the printed materials that it takes to get you properly registered are in place, so I guess I'm ready one more time. I would like to remind all of you that the classes are established by what or how you complete the registration. Please fill it in completely and as accurately as possible. Also, the awards are purchased based on cars that are pre-registered in each class. Once the classes and quantities are established in each class, it is impossible to change a car to another class. Last year 16 cars were changed to classes in which they weren't originally registered. The result was several classes were dropped and two had to be combined. Big heartache for a few people! Don't forget to register with the hotel and remind them you are with the FCA.

Love Ya All,
Marty

Falcon Follies

I live in the Washington, DC, area, and we have certainly been getting our share of snow around here. One pleasant result of this is that I have been reminded of just how well my '67 Futura does in the snow. I drive the Falcon daily, and I haven't had any trouble at all. Indeed, *mirabile dictu*, during the snowstorm the other night I was driving up a long slope with seven inches of fresh snow on the ground, and I passed a 4WD Jeep-type vehicle stuck and spinning its wheels! I hate to say that I laughed as I cruised by in 2nd, at 22mph indicated. Seriously, that high Falcon ground clearance is a winner.

Another advantage to these machines is their simplicity and sensible repair requirements. For example, I noticed the other month that the water pump was going, so I bought a new one, along with fresh hoses and belts (hey, I was going to be in there taking off the old ones anyway!) for about 60 bucks. Installation is a snap. One of the beauties of the Falcon is that when you open the hood, *you see the ground!* Not a pile of spaghetti. My wife's Mercury has miles of vacuum line, arcane hoses, and a zillion little electrical sensors and connectors all quietly corroding there under the hood. The Falcon has a coil, a distributor, and seven wires. Ha! Also, a Falcon won't ding you for major bucks when the constant velocity joint booties blow (doesn't have 'em), or require an engine removal to change the spark plugs.

A summer or so back I was all packed up to ride my BMW twin to a rally (read Barley Therapy) when I found a broken luggage strut. No riding THAT puppy! I just tossed my gear into the Falcon trunk and rolled out for Connecticut. Given an open road I can come close to 25mpg, and at 63 indicated or above, I can pass anything. The pre-55-mph-on-the-highways gearbox eats Toyotas alive! I was pushing it coming back, and I'm sure that as I blew past the imports at some serious speed the stunned occupants were asking, "What the Hell was that??"

There is one thing I want for my car (besides a strock looking paint job), and if anyone can print one up for me I'd be grateful for a big rear window sticker that says:

'67 Ford Falcon — Where will YOUR car be in 25 years?

Where indeed?
